

01_DATA_TYPES\07_COMMAND_LINE_ARGUMENT\Program.cs

```
1 using System;
2
3 namespace _07_COMMAND_LINE_ARGUMENT
4 {
5     class Program
6     {
7         static void Main(string[] args)
8         {
9             /*we can pass parameters to the Main() method and this is possible through
10             * Command Line Arguments in C#. The arguments which are passed by the user or
11             programmer to the
12             * Main() method are termed as Command-Line Arguments in C#.
13             */
14
15             //In C#, the syntax $" " is called an interpolated string.
16
17             //open project properteies and get debug option and type the arguments:
18
19             Console.WriteLine($"First Command Line Argument {args[0]}");
20             Console.WriteLine($"Second Command Line Argument {args[1]}");
21             Console.WriteLine($"Third Command Line Argument {args[2]}");
22             Console.ReadLine();
23         }
24     }
25 }
```
